## PROFILE

Second-year Computer Science student specializing in full-stack web development and AI-powered automation. Built and deployed real-world applications using MERN stack, REST APIs, and cloud platforms. Focused on solving practical problems through scalable systems.”

## EDUCATION

|                                                                                                            |             |
|------------------------------------------------------------------------------------------------------------|-------------|
| <b>Computer Science</b><br><i>NxtWave of Innovation in Advanced Technologies</i>                           | 2024 – 2028 |
| <b>Bachelor of Science in computer Science</b><br><i>Birla Institute of Technology and science, pilani</i> | 2024 – 2027 |
| <b>Intermediate(MPC)</b><br><i>Sri Chaitanya Junior College</i>                                            | 2022 – 2024 |
| <b>SSC Board</b><br><i>Sri Chaitanya High School</i>                                                       | 2022        |

## TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS,Next.js
- Backend: Node.js, Express.js, python, Flask
- Database: MongoDB, SQL
- Tools & Platforms: n8n, Vercel, Render, Git, Base44
- AI/Automation: Google Gemini API, Prompt Engineering, GenAi

## PROJECTS

### NEUROBIZ AI 🔗

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs

- Developed an AI-powered business intelligence platform for small and medium-sized businesses.
- Built dashboards for inventory, procurement, vendor, and marketing management.
- Implemented an AI Health Scan to provide centralized insights into overall business performance.
- Designed interactive data visualizations and business health trends for easier decision-making
- Created a responsive and user-friendly dashboard for non-technical business owners.

### MERN Task Manager Web Application 🔗

**Tech Stack:** React.js, Node.js, Express.js, MongoDB Atlas, JWT, Vercel, Render

- Developed a **full-stack task management system** with JWT authentication and protected routes
- Designed scalable REST APIs handling CRUD operations with user-specific data
- Resolved real-world deployment issues including CORS, API failures, and environment configs
- Deployed production-ready app on Vercel and Render

### ResumeX 🔗

*Resume Analyzer*

**Tech Stack:** React.js, Vite, JavaScript, PDF Parsing, HTML, CSS, Vercel

- Developed an AI-powered resume analysis platform that evaluates resumes and generates ATS compatibility scores.
- Implemented PDF resume parsing to automatically extract and process resume content for analysis.
- Built skill detection, missing skills identification, strengths analysis, and job role prediction features.
- Designed an interactive dashboard displaying ATS score, detected skills, personalized suggestions, and AI-based feedback.
- Deployed the application on Vercel with a responsive and modern UI for seamless user experience.

### RoleFinder – Job Role Matching Platform 🔗

Tech stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Netlify, Render

- Developed a full-stack web application that matches user skills with suitable job roles using a custom matching algorithm
- Built backend APIs using Node.js and Express.js for user authentication and data handling
- Implemented secure login and signup functionality with password hashing using bcrypt and MongoDB Atlas
- Designed a responsive and interactive UI with features like match percentage, progress bars, and best match highlighting
- Deployed the application with frontend on Netlify and backend on Render, ensuring end-to-end functionality

**LoanLens** 

*Smart EMI Calculator*

Tech Stack: HTML, CSS, JavaScript, Chart.js, Responsive Design

- Developed a responsive EMI calculator that computes **monthly EMI, total interest, and total payment** using standard loan formulas.
- Implemented **real-time calculations**, input validation, and an interactive loan comparison feature for better financial planning.
- Integrated **dynamic charts and visual analytics** to display principal vs. interest breakdown, improving user understanding.
- Designed a **modern, mobile-friendly UI** with smooth animations, dark mode, and an intuitive user experience.

**AI-Powered Job Search Automation using n8n** 

Tech Stack : n8n,Google Gemini API,RSS Feeds,Google Sheets,JavaScript (expressions)

- Built an end-to-end AI-powered job search automation system to fetch and process real-time job listings using RSS feeds
- Implemented intelligent filtering logic to match job roles based on user-defined preferences
- Integrated Google Gemini API to analyze job descriptions and extract relevant technical skills
- Structured AI responses into JSON format for reliable downstream automation
- Reduced manual job search effort by automating job discovery and analysis workflow
